

# Test

## R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
MASTER <- read_xlsx("DEPEND/NeuroMAP/Recruitment/Participant Management/NEUROMAP Master V2.xlsx", sheet = "MASTER")
as_tibble(MASTER)
TIMELINE <- read_xlsx("DEPEND/NeuroMAP/Recruitment/Participant Management/R01 Timeline.xlsx", sheet = "TIMELINE")
AGGREGATE <- read_xlsx("DEPEND/NeuroMAP/Recruitment/Participant Management/R01 Timeline.xlsx", sheet = "AGGREGATE")
summary(cars)
```

## Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
